the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 to 13.5 million (1990–2000), and the number of people in the public sector who are employed in health care has increased from 2.5 to 3.5 million (1990–2000) (Department of Health 2001).

There are a number of reasons for the increase in the number of people employed in the public sector. One of the main reasons is the increase in the number of people who are employed in the public sector who are employed in health care. This is due to the fact that the number of people who are employed in the public sector who are employed in health care has increased from 2.5 million in 1990 to 3.5 million in 2000 (Department of Health 2001).

Another reason for the increase in the number of people employed in the public sector is the increase in the number of people who are employed in the public sector who are employed in education. This is due to the fact that the number of people who are employed in the public sector who are employed in education has increased from 1.5 million in 1990 to 2.5 million in 2000 (Department of Health 2001).

A third reason for the increase in the number of people employed in the public sector is the increase in the number of people who are employed in the public sector who are employed in social care. This is due to the fact that the number of people who are employed in the public sector who are employed in social care has increased from 0.5 million in 1990 to 1.5 million in 2000 (Department of Health 2001).
