

Landscape with Changes

a sound installation by Alex Stephenson
with lighting design by Jessica C. Flores

Ph.D. Dissertation Installation
Tuesday, May 31, 2022 – 5:00 to 9:00 p.m.
Conrad Prebys Music Center, Experimental Theater

Alex Stephenson presents his sound installation *Landscape with Changes* in collaboration with lighting designer Jessica C. Flores.

Landscape with Changes began as an online installation in 2021 amidst the COVID-19 pandemic. This will be its first in-person realization, utilizing eight-channel sound spatialization.

Audience members are invited to come and go and can experience the environment whenever and for however long they like.

There are no loops, no exact repetitions of any kind—it is a landscape continually reinventing itself, yet, somehow, always recognizably the same.
